

## About Eight Capital

**Eight Capital is a 100% principal-owned Canadian, full-service investment dealer.** Our primary businesses include investment banking, equity research and institutional sales & trading. The partnership was created in December 2016 by a group of professionals with experience at leading Canadian bank-owned and boutique brokerages. Our goal is to become Canada's leading independent dealer, offering the best advice and execution for our clients.

## The Opportunity

**Position: Associate, Equity Research**  
**Sector: Energy**

Our research associates work with our Sector Analysts to provide comprehensive, timely and in-depth research reports and recommendations for our clients. Currently, we are looking for a research associate in our Calgary office to support the Energy research team.

## Key Responsibilities

- Assist the Analyst in performing analysis of the sector and of companies covered;
- Examine covered companies' prospects, operations and management, leading to investment recommendations for Eight Capital's clients;
- Develop, maintain & update detailed financial models, Excel workbooks, government well data, and industry databases;
- Participate in the ideas generation process via preparation of research publications, morning comments and presentations;
- Projects associated with company initiation's, thematic/company deep dive notes along with special projects for clients;
- Comply with guidelines with respect to professional conduct (e.g. CFA institute standards of practice).

## The Ideal Candidate

- A university degree in a financial or business-oriented discipline (i.e. BComm or MBA). A technical discipline (i.e. engineering or geology) is a plus;
- A CFA designation, or working towards one, is desired but not necessary;
- 1-3 years of experience working at an E&P company, in corporate finance, and/or accounting;
- Competent with Microsoft Excel (prior financial modeling is an asset), experience with geoSCOUT is a plus, but not a requirement;
- Exceptional attention to detail, plus demonstrated writing/communication skills;
- Strong quantitative skills;
- A commitment to working independently under strict time constraints that requires flexibility with respect to hours, days, and tasks; and
- Basic understanding of the Energy sector and a demonstrated interest in the Capital Markets.
